Situation of start and finish

How long to walk

For all stages you had to walk to start and go back to CC. The way is marked: to the start with blue-white ribbons (SU Schöckl), back to the CC with white ribbons (E-energy)

Stage 1: CC – Start > 1300 m (13'); finish to CC > 1000 m
Stage 2: CC – Start > 1500 m (15'); finish to CC > 200 m
Stage 3: CC – Start > 500 m (7'); finish to CC > 500 m

Maps / Symbols

All maps are in scale 1:4000. Stage 1 > A4 / Stage 2 > A3 (North line at an angle) / Stage 3 > A3 (ISSOM 2007 is used with some special signature and not the new ISSOM 2017). Some symbols are not the right size. But it should be clear what you can see. Due to water resistance we use pretext-paper.

421 Impassable vegetation

(forbidden to cross)

An area of dense vegetation (trees or undergrowth) which is impassable or which shall not be crossed, due to forbidden access or because it may constitute a danger to the competitor. It is forbidden to cross impassable vegetation! Competitors violating this rule will be disqualified.

518.1 Underpass or tunnel

An underpass or a tunnel is a passage running underneath the ground, especially a passage for pedestrians or vehicles, crossing under for instance a railroad or a road. (color: black.)

We use a blue color for two levels like the samples. On picture two you can only go beneath the main road!

Traffic-Works

We are running within an urban area, and it is possible that works that do not exist at the time of printing the map, may appear at the time of preparing the event. Similarly, the Parks and Gardens city service could change the green zone, unexpectedly, started working on an area.

Start Point

The starting procedure is as follows:

- 3 Minutes: clean and check
- 2 Minutes: last instructions
- 1 Minute: map handling
- 0 Start (without start-base)

At Stage 3 you have - 5 minutes pre-start and you have to cross traffic light within 2'. For CRET-categories: without start-base. There will be a direct route for runners arriving late. This can only be used if authorized by the Starts Commissioner. For Open and Beginner categories: free start time with start-base

Car-Traffic

The traffic will not stop at any time. Although traffic is limited to these areas, it is very important to watch every time you cross over. Some roads can still be busy. Especially at stage 2. Please, respect the required neutralized crossings which will be monitored by the Organization staff and regulated with the SportIDENT system. Pedestrian crossings regulated by traffic lights must be respected too.

Time out for Crossing Roads

In some places we organize a timeout system. On both sides of the road there will be a control. Time is not running. During this time no map reading is allowed (fair play).

Special note for stages

- There are a lot of construction zone
- Walkways to courtyards may be open or closed. The representation does not always correspond to the real situation, as these doors are opened irregularly. But they have no meaning for the routes and there are no posts in such courtyards.
